

Finding the Right Assisted Living Facility can be stressful, overwhelming, and guilt inducing. Finding the right place can take a lot of time, tours, and energy. Use these questions to help you narrow down you or your loved ones specific care needs. Many places may not be able to offer the care needed and you can screen them before going in for a tour, i.e. some facilities are not licensed to care for a resident who is not ambulatory or some facilities are unable to administer injections or other complex medications.
